

Final Report Meeting of MEXT Project:

Research and Development of Spintronics Material and Device Science and Technology for a Disaster-Resistant Safe and Secure Society

DATE 10:00 ~
Feb. 22 WED, 2017 (Japan time)

VENUE Station Conference Tokyo,
Sapia Tower 5th Floor
1-7-12 Marunouchi Chiyodaku Tokyo
Simultaneous interpretation (Japanese-English) is available.

Achievements of a 5 year-MEXT Project on "Research and Development of Spintronics Material and Device Science and Technology for a Disaster-Resistant Safe and Secure Society," will be presented, which include the materials and devices technologies for high speed, large capacity and environment-tolerant nonvolatile spintronics memory, and a verification of a computing system with spintronics memory by means of simulation.

Chair: Hideo Ohno (Tohoku University)

The meeting is free of charge, but registration is required. Registration will soon open.
